

Safer prescribing that targets your patients

Supporting the provision of patient-centred prescribing decision support to make medicines optimisation safer, simpler and more cost effective.

ScriptSwitch Prescribing – Clinical Decision Support is a clinically-led solution that supports clinicians to prescribe the right medicines, at the right time, in the right quantity.

Embedded within the prescribing workflow and fully integrated with the patient record, it's optimised for every patient.

Benefits

- **Improve patient safety:** Patient-specific safety information displayed at the point of prescribing and on opening a patient record, reduces the risk of harm to patients and avoids hospital admissions, impacting the total cost of care. Gets ahead of the problem before risks arise.
- **Tackle waste and overprescribing:** Unique price and volume cost-saving recommendations (Quantity Limits and Dose Optimisation) provide safer limits on prescribed drugs, impacting the total cost of care.
- **Make switching simple:** An easy-to-read pop-up that prescribers can action in just one-click. Copies the accepted switch straight to the clinical record. Helps to make prescriptions safe and accurate.
- **Maximise control of your profile:** Up to date, targeted, evidence-based recommendations to support the right choice of treatment. Combining a national profile with messages ready to go and the ability to localise content whenever you want. Edit instantly and deploy within the hour.

Understand the impact of medicines waste

The status quo

The cost of wasted medicines diverts money away from paying for the medication people really need, estimated to be 10% of the current volume of medicines*.

Quantity Limits results

5 reasons to implement Quantity Limits

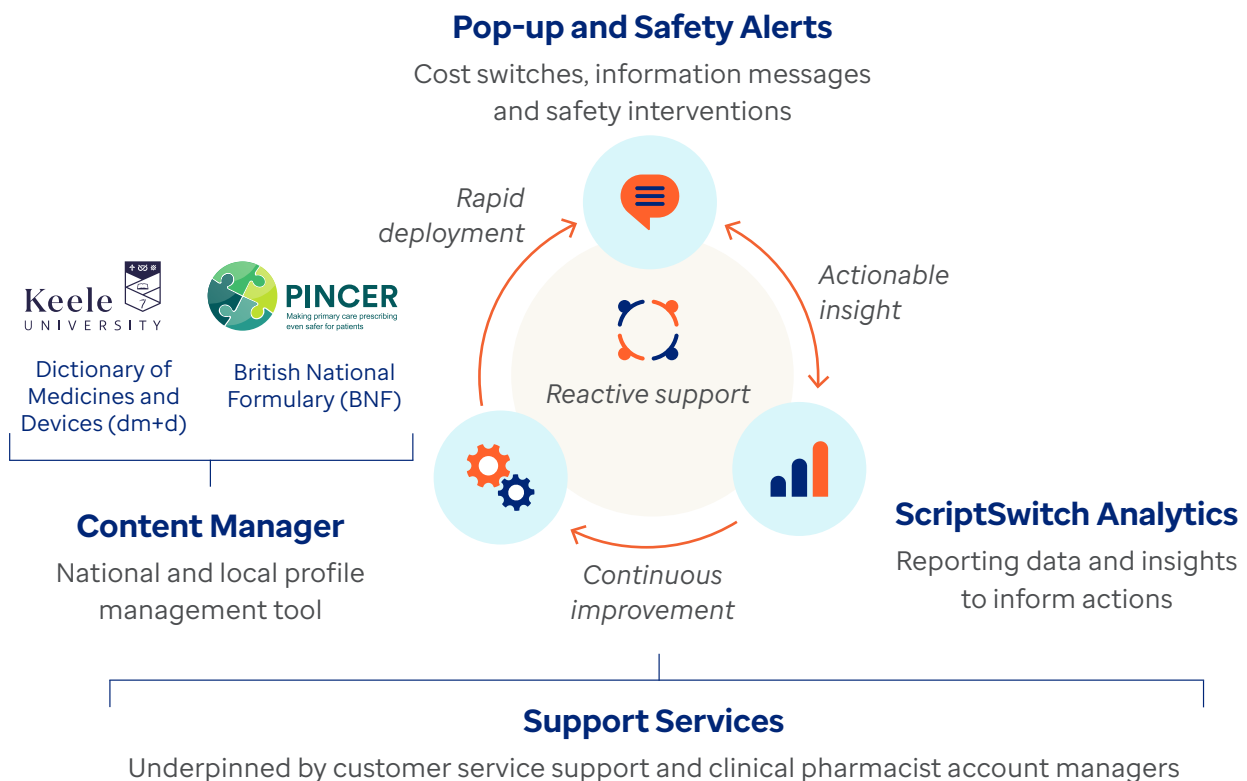

Quantity Limit switches address the volume of products being prescribed offering prescribers a suggested limit to the quantity of the product being issued.

1. Support antibiotic stewardship
2. Reduce quantities and waste of appliances
3. Improve patient safety
4. Mitigate accidental prescribing
5. Contributing to sustainable prescribing

Total cost of prescribing = price x volume

The result: £2.1M Cost benefit to the NHS
(Oct 21-April 23)
